

Lists

You can organize items into ordered and unordered lists.

Unordered Lists

To create an unordered list, add dashes (-), asterisks (*), or plus signs (+) in front of line items. Indent one or more items to create a nested list.

- First item
- Second item
- Third item
- Fourth item

- First item
- Second item
- Third item
- Fourth item

- First item
- Second item
- Third item
- Fourth item

- First item
- Second item
- Third item
 - Indented item
 - Indented item
- Fourth item

Unordered List Best Practices

Markdown applications don't agree on how to handle different delimiters in the same list. For compatibility, don't mix and match delimiters in the same list - pick one and stick with it.

Adding Elements in Lists

To add another element in a list while preserving the continuity of the list, indent the element four spaces or one tab, as shown in the following examples.

- This is the first list item.
- Here's the second list item. I need to add another paragraph below the second list item.
- And here's the third list item
