## Lists

You can organize items into ordered and unordered lists.

## **Ordered Lists**

To create an ordered list, add line items with numbers followed by periods. The numbers don'thave to be in numerical order, but the list should start with the number one.

- 1. First item
- 2. Second item
- 3. Third item
- 4. Fourth item
- 1. First item
- 2. Second item
- 3. Third item
- 4. Fourth item
- 1. First item
- 2. Second item
- 3. Third item
- 4. Fourth item
- 1. First item
- 2. Second item
- 3. Third item
- 4. 1. Indented item
  - 2. Indented item
- 5. Fourth item

## **Ordered List Best Practices**

CommonMark and a few other lightweight markup languages let you use a parenthesis ()) as a delimiter (e.g., 1) First item), but not all Markdown applications support this, so it isn't a great option from a compatibility perspective. For compatibility, use periods only.

## Adding Elements in Lists

To add another element in a list while preserving the continuity of the list, indent the element four spaces or one tab, as shown in the following examples.
